Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species: Species of figures 1A-1C; Species of figures 2A-2B; Species of figures 3A-3D; Species of figures 4A-4B; Species of figures 5A-5B; Species of figures 6-7; and Species of figures 8A-8B. The species are independent or distinct because the claims contain the patentably distinct species.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, at least claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

2. During a telephone conversation with Anne Wang on 01/24/2007 a provisional election was made without traverse to prosecute the invention of species of figures 3A-

3D, claims 1-8 and 11. Affirmation of this election must be made by applicant in replying to this Office action. Claims 9 and 10 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-8 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Koike et al. (U.S. 5,928,250).

Koike et al. discloses the method steps as claimed in figures 7-11 and (col. 5, line 56 thru col. 6, line 24) as follow: advancing an elongated hollow body (1) through a first elongated tubular member (2) to a first position such that the elongated hollow body (1) having a distal tip (25) sharp enough to puncture through a proximal membrane (at D); advancing the elongated hollow body (1) distally through the punctured proximal membrane (D) whereby the distal tip (25) of the elongated hollow body (1) moves into a second configuration (as shown in fig. 10) having a blunt distal surface (located at 28) which would facing the distal membrane; wherein the first elongated tubular member (2) is considered a dilator.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lesh et al. (U.S. 6,650,923) discloses a method for accessing the left atrium of the heart.
